

臺灣科技大學 · 管研所EMBA 研究方法

理論假說與觀念架構

課程大綱

- ➔ 抽象階梯
 - 實物 objects 【實體 entity 或實務 practice】
 - 變數 variables
 - 概念 concepts 與假說 hypotheses
 - 構念 constructs 與命題 propositions
 - 理論 theory
- 假說、命題與理論的提出
- 觀念架構圖

抽象階梯：起源

- 意義：人類思想或行為發展的語言呈現，可用抽象階梯來表達由最底層的實物或實體語言開始，愈往上將成為愈抽象的語言
- 從最實物的東西 → 變數 → 概念 → 構念 → 理論【愈來愈抽象】

構念與概念

特徵	構念 (Construct)	概念 (Concept)
定義	基本的、抽象的思想或標籤	構念經過操作化的理論構造
抽象程度	高度抽象	相對具體，需要具體的測量指標
測量方式	不直接測量，需進一步操作化	通過具體的指標或工具進行測量
作用	理論建構的基礎，幫助理解和分類現象	用於檢驗理論假設，具體化研究中的變數
範例	智力	邏輯、語言文字、空間、音樂、肢體運作、內省、自然探索
關聯性	構念依賴於概念，通過操作化使其可測量和分析	

- **研究主題：** 員工的工作滿意度對工作績效的影響
- **構念：**
 - 工作滿意度 (Job Satisfaction)
 - 工作績效 (Job Performance)
- **概念：**
 - **工作滿意度**的概念可以包括對薪資的滿意度、對工作環境的滿意度、對主管的滿意度等，這些具體的指標可以通過問卷調查來測量。
 - **工作績效**的概念可以包括完成工作的效率、工作質量、創新能力等，這些可以通過主管評估、同事評價或客觀績效數據來測量。

變數 variable 的意義

上帝的積木堆
構念
概念
變數

- 變數：最簡單說，就是會隨時改變的數
- 概念常以變數的形式存在，而可加以衡量與研究
- 自變數 independent variable
 - 在研究中我們可操作、控制或處理的變數
 - 藉由自變數的操作，我們希望瞭解它如何影響或解釋應變數的變化
 - 如：加薪幅度如何影響生產力之提高
- 應變數 dependent variable
 - 研究者無法直接控制或處理，但希望能影響的變數
 - 藉自變數的改變來影響應變數
 - 如：藉由加薪幅度來提高生產力
- 變數與變數間【或概念與概念間】的關係：假說 hypothesis, hypotheses
- 【構念與構念間】的關係：命題 proposition

上帝的積木堆

構念
概念
變數

- ## 觀念架構圖：各種變數間的關係
-
- 維他命C
攝取量
- 對感冒的抵抗力
- 自變數
- 應變數
- 性別
- 維他命C
攝取量
- 對感冒的抵抗力
- 調節變數
- 自變數
- 應變數
- 維他命C
攝取量
- 激活抗體細胞
- 對感冒的
抵抗力
- 自變數
- 中介變數
- 應變數
- 陽光照射量
- 自變數與干擾變數間：較少有因果關係
- 自變數與中介變數間：通常存有因果關係
- 自變數 Independent V:** 研究者可控制或處理
應變數 Dependent V: 研究者無法直接控制或處理，但希望能影響的變數
- 調節變數 Moderator:** 會強化或減弱自變數與應變數間關係的變數
- 控制變數 Control V:** 常為人口統計變數，控制不變，以確定自變數和應變數間的關係
- 中介變數 Mediator:** 介於自變數與應變數之間的變數【可藉此，發現其它可能的自變數】

概念的內涵：變數 variable

上帝的積木堆
構念
概念
變數

- 中介變數 mediating variable
 - 解釋自變數與應變數間的作用機制或過程
 - 如：加薪幅度會影響到工作滿意度，進而影響生產力提高
- 控制變數 control variable
 - 研究者刻意保持不變的變數
 - 目的是排除其他影響因素，好專注特定變數間的關係
 - 如：只取男性樣本，以排除性別對維他命 C 攝取量與感冒抵抗力的影響

單一變數的研究

- 在探索性與敘述性研究中，我們常只研究單一項變數
- 如：本公司過去半年的業績為何？
- 如：員工薪資十年來增加的幅度為何？

兩變數間的關係

- 不同變數間存有不同的關係，大部分的研究是探討兩個或以上變數間的關係
- 兩變數間關係的分類
 - 無關係：兩變數間不存在特別的關係
 - 相關關係：兩變數間呈現同時增加或減少，或一增一減的關係
身高愈高體重愈大【無因果關係】
或加薪幅度愈高生產力愈高【可能有因果關係】
 - 因果關係：一變數的增減導致另一變數因而增減
- 上述關係的分類，對自然科學或社會科學領域，基本上都相同

自變數

應變數

兩變數 → 三變數間的關係

上帝的積木堆
構念
概念
變數

- 當兩變數間的關係被瞭解後
 - 單純兩變數的研究已無法滿足我們對知識的探求
 - 研究人員開始思考中介或調節變數的影響
 - 於是，進入三個以上變數的研究

- When an area of inquiry is new, the focus may be on establishing a causal link between two variables.
【在新領域，我們想瞭解哪兩變數間存有因果關係】
- But, once an association has been established, it becomes critical for researchers to clearly describe and measure the process by which variable A affects variable B.
【瞭解因果存在後，我們想進一步衡量並說明因如何影響果】
- As an area of inquiry becomes more mature, multiple mediators may need to be included.
【瞭解因果後，再繼續想是否有哪些中介變數】 【Bono 2011, p. 659】

兩變數 → 三變數間的關係

上帝的積木堆
構念
概念
變數

- 當自變數、應變數、中介變數與調節變數陸續被研究後
- 可能有學者，會將相關研究整合為
 - 前因與後果的研究
 - 讓我們得以一窺某重要概念【或題材】的全貌
- 例子
 - Anderson & Sullivan 1993_The antecedents and consequences of customer satisfaction for firms
 - Jaworski & Kohli 1993_Market orientation: antecedents and consequences

假說的角色 1

- 所有科學都始於假說【假設的說法】— 待證明的猜測
 - 假說的形成涉及個人對事物現象的解釋，通常與個人的經驗、背景有關
 - 猜測可能的答案，不是瞎猜，是有根據的猜測，an educated guess
 - 假說常常是錯誤的
- 大膽假設，小心求證
 - 研究者應勇於問「為什麼」，並猜測各種可能的答案，而後以嚴謹方法蒐集資料並驗證
 - 對於在一片渾沌現象中追尋秩序的人來說，有假說總比袖手旁觀好
(赫胥黎 Huxley, 1825-1895) (王溢然 2001a: 1)

假說的角色 2

- All Scientific work of an experimental or exploratory nature starts with **some expectation about the outcome**. This expectation is a **hypothesis**. 【Phillips & Pugh 1987, p. 14】
所有實驗或探索的科學，都始於對實驗結果的一種預期。這預期就是假說
- Hypotheses arise by **guesswork**, or by **inspiration**, but having been formulated they can and must be tested rigorously, using the appropriate methodology. 【Phillips & Pugh 1987, p. 14】
假說源自猜測或靈感，當假說形成後，就必須藉適當的研究方法蒐集資料，並嚴格驗證假說【統計學的一章】

假說的角色 3

- The key to a quality dissertation is to use a sound theoretical/empirical base for hypothesis development. 【Gardner & Beatty 1980, p. 8】
 - 假說的提出係建立於合理的理論或邏輯推理
 - 也可能建立於實證的基礎【這有時可能迥異於過去的理論】
- You should be able to say “Based on this theory and supported by these studies” this hypothesis makes sense. 【Gardner & Beatty 1980, p. 20】
 - 根據某理論，加上蒐集的資料佐證，研究者應該能明確說出：這「結果」是由這些「原因」所造成的

提出研究假說

- 對於研究的問題，提出暫時或猜測性的答案
- 例 1：工作滿足與工作績效有何關連性？
 - 假說：工作滿足與工作績效間有正相關
- 例 2：領導風格對部門績效有何影響？
 - 假說：當主管的領導風格為甲型時，其部門績效比主管的領導風格為乙型時高

假說的驗證

- 為確認社會科學理論的正確性，而需對不同樣本反覆進行驗證
- 對不同類型企業、地區、種族的員工加以研究，是否都能得到相同結論，而後，才能確知某理論是否正確及是否有限制
 - 依此道理，美國所做過的研究，可拿到台灣重做
 - 這樣的研究依然有其價值，只是貢獻不大！
- 若不同樣本、不同研究方法都得到相同的結論，則理論的正確性就更大了
- 萬一，假設未獲得驗證？
 - 代表與原先的猜測不一致
 - 取樣或衡量有問題？另有其他變數調節？
 - 可能，理論有瑕疵，而須修正
 - 也可能，理論有其適用的邊界 boundary

理論：階梯的最抽象層

- 理論：對某現象，一種系統性的看法，以試圖解釋或預測該現象

- 理論：

上帝已預先存放各式各樣的積木，少數我們知道，大部分是我們不知道的

- 在抽象階梯最底層看到某種現象【實物 what】
- 到較上層的積木堆中找尋相關的【構念、概念與變數 why】
- 將零散積木【構念、概念或變數】以嚴謹邏輯排列，建構起關係，以解釋或預測該現象【暫時性理論 how】
- 理論需被反覆驗證【是否為真】；理論並非放諸四海皆準【超過 boundary 就可能不適用】

猜測的關係，也就是假說或命題
數個假說或命題，藉邏輯串成系統性的看法

- 以簡馭繁：

- “... theory allows generalization from specific examples ...”【AMR-Haveman 2019: 241】
- 蘋果會落地，同理，其它東西也都會落地【演繹法】
- 單純報導某地為長壽村【what】意義不大，還要加原因和作法【why and how → 不必搬到長壽村，也可長壽】

理論的意義

- A **theory** is a set of interrelated constructs (concepts), definitions, and propositions that present a systematic view of phenomena by specifying relations among variables, with the purpose of explaining and prediction the phenomena. (Kerlinger & Lee , 2000: 11)
- **理論**包含一些彼此相關的構念、概念、定義及命題，並藉由描述構念、概念等變數間的關係，來提供對某自然或社會現象，一種系統性的看法，以試圖解釋或預測該現象

理論的功用 (AMR, Haveman 2019)

- **... it is theory that gives meaning to empirical results** (Cortina, 2016; Van de Ven, 2007). Theory guides us to what questions to ask and tells us why they are important.
 - 理論引導我們，去提問、蒐集和分析資料、以試圖解釋或預測該現象
 - 現實世界的許多事件，背後都有其原因，而這些原因的可能推測就是理論
- It can be easy to slip into sloppy reasoning or to come to the edge of theory without quite getting there. For example, listing variables and their relationships without theory-based causal analysis, or creating the ubiquitous boxes and arrows without explanatory text—this is not theory. Theory forces us to dig into the explanation and to use logical reasoning. Without theory, empirical research can devolve into running numerous models and experiments and reporting any statistically significant results (Shrout & Rodgers, 2018; Simmons, Nelson, & Simonsohn, 2011).
- 許多所謂的理论，其實是鬆散而不合邏輯的
- 單純列舉變數，並透過觀念架構的方形圖與箭號來描述變數間的關係，卻不能合理解釋真實事件的相關或因果關係，並不能算是理論

抽象階梯 ladder of abstraction

- 理論包含一些彼此相關的構念、概念、定義及命題，並藉由描述構念、概念等變數間的關係，來提供對某自然或社會現象，一種系統性的看法，以試圖解釋或預測該現象
 - "A theory is a set of interrelated constructs (concepts), definitions, and propositions that present a systematic view of phenomena by specifying relations among variables, with the purpose of explaining and prediction the phenomena." (Kerlinger & Lee, 2000 : 11)

所有這些努力都是試圖
【揣摩上帝的旨意】

理論

- 一群人很快樂：猜是常吃香蕉皮所致
- 【香蕉皮抗憂鬱】的理論【色胺酸】
- Generalization: 失戀要吃香蕉皮

積木堆

- 構念：熱帶水果、營養成分、有機 ...
- 概念：香蕉
- 變數：大小、熟度、味道、 ...

實物或實務

- 看到有一群人總是很快樂！Why?
- We need a theory! 因此，我們研究與思考 ...
- 研究發現：可能跟他們飲食有關吧！
- 可能因他們常吃 ...

積木堆：大小、形狀、顏色不同的各種積木

研究和理論有何關係？

- ...
- If we see an organization doing well, we want to reproduce the success; if we see one doing poorly, we want to prevent failure.
 - Either way, we need ... research, so that we may be able to propose ...
 - a theory—an explanation of what is causing the observed outcomes.
- AMR-Pentland, 1999, Building process theory with narrative: from description to explanation

Explanation is essential to theory and practice. If we see an organization doing well, we want to reproduce the success; if we see one doing poorly, we want to prevent failure. Either way, we need a theory—an explanation of what is causing the observed outcomes. As Sutton and Star argue, explanation is the core of good theory; it is "the answer to queries of why" (1995).

假說如何提出？

理論：

- 看到抽象階梯最底層的某種現象【實物 what】
- 到較上層的積木堆中找尋相關的【構念、概念與變數 why】
- 將零散積木【構念、概念或變數】以嚴謹邏輯排列，建構起關係，以解釋或預測該現象【暫時性理論 how】
- 理論需被反覆驗證【是否為真】；理論並非放諸四海皆準【超過 boundary 就可能不適用】

上帝已預先存放各式各樣的積木，少數我們知道，大部分是我們不知道的

猜測的關係，也就是假說或命題
數個假說或命題，藉邏輯串成系統性的看法

- 假說是一種猜測【假說是變數間或概念間的關係猜測】【命題則是構念間的關係猜測】
- 這猜測應該是合理、邏輯、可匹配到日常生活，並能讓讀者瞭解【也可能匪夷所思，而難瞭解】
- 這猜測【假說】並非隨意的瞎猜，而應該是一種 **educated guess**
 - 基於前人理論，知道某兩【或三】變數間可能存有關係，因此延續該理論，試圖驗證變數間的關係
~~假說的推理與提出，常引述很多零散文獻，以為這樣就是奠基在前人的理論~~
 - 基於邏輯推理，認為或推測某兩【或三】變數間，可能存有關係
~~假說的推理與提出，常是說理不通的邏輯，致牽強附會而不知所云~~
 - 基於實證觀察，認為或推測某兩【或三】變數間，可能存有關係
~~假說的推理與提出，很難在現實世界中，找到可匹配的實例~~

- You should be able to say “Based on this theory and supported by these studies” this hypothesis makes sense. (Gardner & Beatty 1980: 20)

- 根據某理論，加上蒐集的資料佐證，研究者應該能明確說出：這「結果」是由這些「原因」所造成的

文獻探討之後

- 透過文獻探討，對主題有進一步瞭解後
 - 【碩生】將研究相關的論文分類列舉（表格式文獻整理）
 - 【博生】將相關的論文整合與比較（跳脫表格式，有進一步的合理性、邏輯性）
 - 【嚴謹學者】將論文整合與比較後，加以評論並找出可改善之處（[Gap](#)）
 - 不同層次的學問，有待大家努力提升
- 無論如何，文獻探討後都應該有能力將研究主題拿捏更準
 - 更清楚瞭解想要研究的概念或變數有哪些
 - 更清楚瞭解概念或變數間，可能存在何種關係
 - 同時也應該能猜測，概念或變數間關係的可能方向（假說）
 - 另外，也可能以圖示方式，描述概念或變數間的關係
— **觀念架構圖** 【研究架構】

觀念架構的意義 conceptual framework

- 同義詞：理論架構、概念架構、研究架構
- 觀念架構圖是由圓形（或矩形、方框）、線條和箭頭組成來簡要呈現研究概念間可能存在的關係

- 圓形（或矩形、方框）代表構念、概念或變數
- 線條代表構念、概念或變數間的關係
- 箭頭表示可能存在的因果關係
 - 箭頭：X會影響Y
 - 無箭頭：X與Y有關係
 - 身高和體重有關係，但身高不一定會影響體重
- 透過「觀念架構圖」可將事情的脈絡表達出來

- 觀念架構圖本身並不是理論
- 觀念架構圖加上嚴謹邏輯與合於事實的因果關係說明，以構成暫【待驗證的假說或理論 *tentative hypotheses* or *tentative theory*】

- AMR-Crossan_1999 文章“Organizational Learning: Toward a **Theory**”於被接受刊登時，評審要求改題為“**An Organizational Learning Framework: From Intuition to Institution**”【本文的想法仍待驗證，還不到理論的層級】此文於 2009 獲頒“Decade Award” to recognize the most cited article from the past decade

觀念架構圖的重要性：從 Summers 2001 的一些 quotations

- There are several basic reasons for rejecting manuscripts ... : The **conceptual framework** is not well developed (e.g., lacks precise conceptual definitions of the **constructs** and/or compelling theoretical rationale for the hypotheses).
被退稿的普遍原因之一：觀念架構圖不佳
【構念缺乏明確定義，或假說的提出顯得牽強、無趣或缺乏令人信服的邏輯】
- With regard to the **conceptual framework**, readers should concern themselves with whether the conceptual definitions are sufficiently unambiguous and whether the theoretical rationale provided for each of the hypotheses is convincing.
觀念架構圖中，各構念或概念的定義要很明確。假說的理論基礎和邏輯推導必須很可信【能和現實聯結】
- It is often the case that researchers clarify their own thoughts, identify problems with their **conceptual framework**, and discover new ideas solely as a result of communicating their current thinking to others. The mere process of orally explaining their thoughts to others forces researchers to examine their ideas more deeply. Hence, it is almost always a mistake for researchers to wait until they feel their **conceptual frameworks** are very well developed before exposing them to others. Although almost anyone willing to listen and read what has been written can be helpful, particularly valuable are those who constantly ask for clarification and question the researcher's assumptions, conceptual definitions, and theoretical rationale.
在和他人討論中，常可發現觀念架構圖缺失。因此，不要等自認完善後，才找他人討論
【忠言逆耳，卻彌足珍貴】

觀念架構圖的重要性：Summers 2001

- There are several basic reasons for rejecting manuscripts ... : The conceptual framework is not well developed (e.g., lacks precise conceptual definitions of the constructs and/or compelling theoretical rationale for the hypotheses).
被退稿的普遍原因之一，是觀念架構圖不佳
- With regard to the conceptual framework, readers should concern themselves with whether the conceptual definitions are sufficiently unambiguous and whether the theoretical rationale provided for each of the hypotheses is convincing.
觀念架構圖中，各概念或概念的定義應該很明確。假說的理論基礎和邏輯推導應該可信
- It is often the case that researchers clarify their own thoughts, identify problems with their conceptual framework, and discover new ideas solely as a result of communicating their current thinking to others. The mere process of orally explaining their thoughts to others forces researchers to examine their ideas more deeply. Hence, it is almost always a mistake for researchers to wait until they feel their conceptual frameworks are very well developed before exposing them to others. Although almost anyone willing to listen and read what has been written can be helpful, particularly valuable are those who constantly ask for clarification and question the researcher's assumptions, conceptual definitions, and theoretical rationale.
在他人討論中，常可發現觀念架構圖缺失。因此，不要等自認完善後，才找他人討論
【忠言逆耳，卻彌足珍貴】

- It is important for researchers to aggressively solicit criticism of all aspects of their conceptual framework. It is only when continued exposure of the conceptual framework to criticism ceases to uncover serious flaws and all necessary revisions have been made that researchers should move to the design phase. The time to revise the conceptual framework is before the data are collected. After the data are collected, researchers are severely restricted by the available measures as to what changes they can make in their conceptual frameworks.
請他人檢視和批判我們的觀念架構，待沒問題後，才進入研究設計階段。
一旦資料蒐集後，將很難回頭修改觀念架構
- *Conceptual contributions* could involve such things as:
... the identification and conceptual definition of additional constructs to be added to the conceptual framework (e.g., additional dependent, independent, mediating, and/or moderator variables);
若能在觀念架構中發現新的應變數、自變數或中介、調節變數，都是很大的理論貢獻

觀念架構圖的功用

- 宏觀：幫助研究者以宏觀思維，檢視研究問題的本質
- 簡要：有助於將眾多想法，精簡為變數與變數間的關係
- 指引：像燈塔一樣，引領研究的進行
- 溝通：有助於讀者對研究重點的瞭解和溝通
- 寫作：架構圖的元素，可成為文章的標題一與標題二【見如下 JM 文章的對應關係】
 - 如 JM-Homburg_2014_Looking beyond the horizon, how to approach the customers' customers in B2B markets

Introduction 【原文無此標題，自行添加】

質化研究：有研究架構圖嗎？

market intelligence takes the form of selecting target markets, designing and offering products/services that cater to their current and anticipated needs, and producing, distributing, and promoting the products in a way that elicits favorable end-customer response. Virtually all departments—not just marketing—participate in responding to market trends in a market-oriented company.

Synthesis and Commentary

From the preceding discussion, we offer the following formal definition of market orientation.

Market orientation is the organizationwide *generation* of market intelligence pertaining to current and future customer needs, *dissemination* of the intelligence across departments, and organizationwide *responsiveness* to it.

Defining market orientation as organizationwide generation, dissemination, and responsiveness to market intelligence addresses the concerns of Barksdale and Darden (1971) by focusing on specific *activities* rather than philosophical notions, thereby facilitating the operationalization of the marketing concept. Interestingly, it appears more appropriate to view a market orientation as a continuous rather than a dichot-

Research Propositions

Figure 1 is a conceptual framework for the following discussion. Briefly, the framework comprises four sets of factors: (1) antecedent conditions that foster or discourage a market orientation, (2) the market orientation construct, (3) consequences of a market orientation, and (4) moderator variables that either strengthen or weaken the relationship between market orientation and business performance. We discuss each of the four factors and develop propositions based on the literature and the field interviews.

Antecedents to a Market Orientation

Antecedents to a market orientation are the organizational factors that enhance or impede the implementation of the business philosophy represented by the marketing concept. Our examination of the literature and the insights from the field interviews reveal three hierarchically ordered categories of antecedents to a market orientation: individual, intergroup, and organizationwide factors. We label these as senior management factors, interdepartmental dynamics, and organizational systems, respectively.

Kohli, Ajay K. & Bernard J. Jaworski (1990), "Market Orientation: The Construct, Research Propositions, and Managerial Implications," *Journal of Marketing*, 54 (April), 1-18.

質化的研究架構圖

Neil A. Morgan, Eugene W. Anderson, & Vikas Mittal

Understanding Firms' Customer Satisfaction Information Usage

Despite theoretical and empirical research linking a firm's business performance to the satisfaction of its customers, knowledge of how firms collect and use customer satisfaction information is limited. The authors investigate firms' customer satisfaction information usage (CSIU) by drawing on in-depth interviews, a focus group of gate firms' customer satisfaction information usage (CSIU) by drawing on in-depth interviews, a focus group of gate firms' managers, and the existing literature. They identify key characteristics of the major processes involved in firms' CSIU and compare the CSIU practices revealed in their fieldwork with widely held normative theory prescriptions. They also identify variations in CSIU among the firms in the fieldwork and uncover factors that may help explain the observed differences.

Morgan, Neil A., Eugene W. Anderson, and Vikas Mittal (2005), "Understanding Firms' Customer Satisfaction Information Usage," *Journal of Marketing*, 69 (July), 131-151.

Appendix Qualitative Depth Interview Protocol

1. How is CS measured here?

- Measures: complaints, overall CS, CS with different aspects of product and exchange, outcomes or perceptions/expectations, importance weights, attribute drivers versus cues.
- Frequency: time frames, systematic or around key events (e.g., test marketing new product).
- Sampling: all customers versus subset, current versus previous customers/defectors, customers versus prospects, competitors' customers, end users versus channel.
- Data collection method: qualitative versus quantitative, complaints versus CS, written survey versus telephone versus face-to-face, internal versus third party, primary versus secondary.
- Processes: formalized versus informal.

2. How is CS data analyzed and interpreted?

- Data analysis tools: averages, correlations, multiple regressions, and so forth.
- Relationships examined: purchase behavior, market performance, financial performance, employee satisfaction, other internal metrics.

3. How is CSI disseminated within the organization?

- Frequency.
- Channels and media used.

Understanding Customer Experience Throughout the Customer Journey

Understanding customer experience and the customer journey over time is critical for firms. Customers now interact with firms through myriad touch points in multiple channels and media, and customer experiences are more social in nature. These changes require firms to integrate multiple business functions, and even external partners, in creating and delivering positive customer experiences. In this article, the authors aim to develop a stronger understanding of customer experience and the customer journey in this era of increasingly complex customer behavior. To achieve this goal, they examine existing definitions and conceptualizations of customer experience as a construct and provide a historical perspective of the roots of customer experience within marketing. Next, they attempt to bring together what is currently known about customer experience, customer journeys, and customer experience management. Finally, they identify critical areas for future research on this important topic.

Keywords: customer experience, customer journey, marketing strategy, customer experience management, touch points

觀念架構圖：如何判定好壞

- 我們都是從【上帝的積木堆】中，試圖找到好的積木，組合成好的理論
 - 幫助我們瞭解現象
 - 進而解釋現象背後的意義或因果
- 每個人的想法不同，提出的理論也不同
- 努力組合出來的【觀念架構圖；或理論】，如何判定好壞？
 - 邏輯與推論的嚴謹性、與事實的 match，可在相當程度內合理解釋現象、簡約、...
 - It can be easy to slip into sloppy reasoning or to come to the edge of theory without quite getting there. 【AMR-Haveman 2019, p. 241】

好理論的條件

- 清晰與符合邏輯 (clear & logical)
- 內部一致 (internal consistent)
- 提供可驗證之假說 (testable hypothesis)
 - 從理論中假設一些現象，並透過資料蒐集來驗證假說之正確性。如日、月蝕現象
- 可被推翻與否定 (can be disconfirmed or falsified)
 - 在假說的推翻與否定中，改良舊有的理論俾更準確描述現象【理論的邊界 boundary】
 - Egas Moniz，1949 諾貝爾醫學獎的被推翻
 - 永遠有專門存在！只是還沒被發現而已
- 通則性 (generalizability, 一般化)
 - 統計的一般化：由樣本到母體
 - 外部效度：不同的母體、時間、衡量尺度與情境
- 儉約的 (parsimonious)

常見的混淆

研究程序圖

研究架構圖（觀念架構圖）

- 抽象階梯
 - 實物 objects 【實體 entity 或實務 practice】
 - 變數 variables
 - 概念 concepts 與假說 hypotheses
 - 構念 constructs 與命題 propositions
 - 理論 theory
- 假說、命題與理論的提出
- 觀念架構圖

抽象階梯、理論假說與觀念架構：take away

- 抽象階梯是人類語言學習的進化過程，也是彼此溝通的媒介
- 從最實物的東西 → 變數 → 概念 → 構念 → 理論【愈來愈抽象】
- 將【變數、概念與構念】三者打散，成為零散的積木堆，是為【上帝的積木堆】
- 任何人都可依其研究和邏輯推理，從上帝的積木堆尋找素材，去建構他對周遭環境的瞭解或說明【是為理論】
揣摩上帝的旨意
- 上述的建構：皆是由猜測開始【假說或命題】，並須遵循合乎邏輯與可實證的原則
- 系統性建構的一系列假說或命題，最終即形成暫時性理論，可解釋環境的現象
- 暫時性理論需經重複驗證，才會被逐漸接受【但，一個反證，就可以推翻該暫時性理論】
- 要用文字來描述研究的所有內涵，是很不容易的
- 藉由觀念架構圖的繪製【由圓形（或矩形、方框）、線條和箭頭組成】與修改，可快速、簡要呈現研究概念間可能存在的關係，而有助於思維的釐清和向他人的請益【End】
